PROFILE SUMMARY

Politeknik Negeri Banyuwangi student and aspiring Data Scientist with strong expertise in data analysis, machine learning, and software development. Experienced in building data-driven solutions and APIs using Python, Laravel, and Flutter, including the development of an integrated campaign management system utilizing artificial intelligence. Highly motivated to apply advanced algorithmic modeling and data extraction techniques to support strategic and impactful decision-making in the professional world.

EDUCATION

Politeknik Negeri Banyuwangi | 2023 - Present

Applied Bachelor's Degree (D4) in Software Engineering Technology | GPA: 3.70/4.00

SMKN 1 Panji | 2020 - 2023

Computer and Network Engineering (TKJ)

PROJECT EXPERIENCE

Flutter Developer — Aplikasi Mobile Bantuin

Campus Project-Based Learning | Jan 2025 – 2026

- Actively participated in daily stand-ups, sprint planning, and retrospectives with 5 other student team members to ensure technical alignment and timely achievement of project targets.
- Developed the mobile frontend interface using Flutter and integrated backend functionality with Firebase (User Authentication and Firestore Database).
- Implemented optimized UI/UX feature updates based on design decisions and user feedback from System Usability Scale (SUS) testing and the Maze platform.

Backend Developer — REST API Aplikasi POS "Kasir Pintar"

Software Development Project | Jan 2024

- Built a robust, secure, and reliable RESTful API from scratch using Laravel and MySQL to support a Flutter-based Point of Sales (POS) application.
- Resolved critical data concurrency issues by implementing Database Transactions (commit-or-rollback), ensuring 100% accuracy in stock and sales records during simultaneous transactions.

- Secured API endpoints using Laravel Passport for token-based authentication and conducted rigorous endpoint testing using Postman to guarantee seamless frontend integration.

Data Scientist — Integrated Campaign Management System (Capstone Project)

SIB Dicoding Coding Camp Team | March 2026 – June 2026

- Developed an integrated campaign management system for MSMEs/small businesses equipped with a Budget Optimizer and AI-based smart influencer matching.
- Designed and implemented a machine learning model for the AI Influencer Matching feature, improving the targeting accuracy of influencer profiles relevant to MSME market segmentation.
- Contributed to formulating algorithms for the Budget Optimizer feature to maximize ad budget allocation and client marketing expenditure efficiency.

SKILLS

Technical Skills: Python, SQL, Laravel, Flutter, Machine Learning (Supervised/Unsupervised, K-Means, Recommendation Algorithms), Data Analysis & Visualization (Streamlit), Web Scraping, Git/GitHub, API Design.

Soft Skills: Problem Solving, Team Collaboration, Technical Communication, Time Management, Project Planning.

AWARDS

2nd Place for Unique Innovation (ICT Innovation Creation Category)

KMIPN VII, Politeknik Negeri Padang | 2025

- Achieved 2nd place nationally at the National Polytechnic Informatics Student Competition (KMIPN) for developing a creative and distinctive technological solution.
- Gained recognition among polytechnic students across Indonesia for presenting an innovative approach to solving challenges in the ICT sector.

CERTIFICATIONS & TRAINING

- **SIB Coding Camp By DBS Foundation 2026** — Dicoding Indonesia (2026)
